

M1 DEGs classified by sex and inflammatory gene set

Sex-overexpressed
DEG proportion

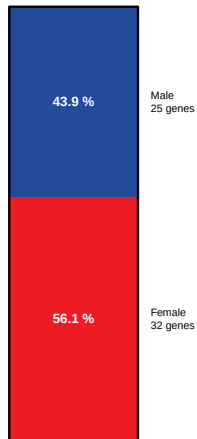

Anti-inflammatory genes

Total evaluated:
23 DEG genes

List: expanded immunometabolic
bibliography set (403 genes)

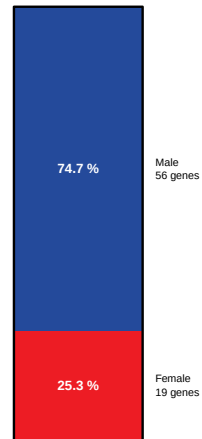

Anti-inflammatory genes

Total evaluated:
57 DEG genes

List: general anti-inflammatory
curated set (91 genes)

Pro-inflammatory genes

Total evaluated:
75 DEG genes

List: general pro-inflammatory
curated set (133 genes)
