

Anti-inflammatory M1 DEGs: immunometabolic list vs added classic immune genes

Sex-overexpressed
DEG proportion

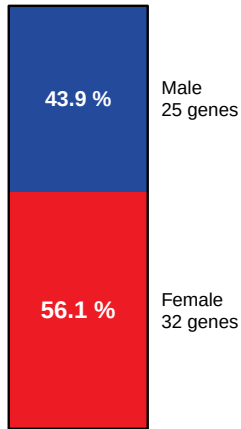

Expanded immunometabolic

Total evaluated:
23 DEG genes

Expanded immunometabolic list
anti-inflammatory subset
403 genes screened

Expanded + classic immune

Total evaluated:
57 DEG genes

Immunometabolic subset plus
classic markers/interleukins
91 anti-inflammatory genes screened
